

## Service

You know how important it is to ensure that your equipment is maintained at peak performance. To achieve this you need to be supported by a Beta LaserMike service team that can offer you guaranteed quality with a fast turnaround at a competitive price. At all Beta LaserMike service centers we have the resources to provide the best in:

- Quality

As the manufacturer, we use only new, design-approved parts, and technicians who have been trained in the repair and assembly of our products. This is critical for the maintenance of precision measuring equipment and systems.

- Response

We have an extensive inventory of parts, so we are able to provide the fastest turnaround available.

- Price

We offer a very competitive overall price by using our standard manufacturing inventory and actual labor hours. (Our service personnel are not commission-based). We also offer very effective customized service plans that minimize your repair and maintenance costs. These programs can save you up to 20% on your spare parts requirements.

We are absolutely committed to providing the best service in our industry. Please be aware that we have not authorized any other organization to service your equipment. To do so would compromise your warranty, quality, response, and price.

Please do not hesitate to call us to discuss our available service programs. Let us customize a contract that minimizes your costs and optimizes the performance of your equipment.

Sincerely,

Dan Norris

Director of Operations
